

Used on a tracked skid steer, EDGE planetary augers are great in landscaping applications.

Choosing the right auger attachment requires experience, but the team at CEA can help you determine the correct auger drive for your machine and application. Factors to consider are: soil condition, hole width and depth, and hydraulic power of your machine. With a full auger line available from CEA, we are sure to provide you the correct mounting plate, hydraulic-powered auger drive unit, auger drilling bit, and specialized wear parts for your job.

The gear reduction drive units are designed for heavy-duty use in commercial and industrial applications. This is the ultimate auger attachment for those who demand the best and most durable units. Planetary drive augers feature high torque and heat treated drive shafts. Choose auger drive units and bits in 2-9/16" Round or 2" Hex output shafts. Complete units include the universal skid steer mount, hoses and couplers. All bits sold separately.
