

Land Clearing Attachment

EDGE

- Minimum maintenance: no belts to tighten or bearings to grease
- Shreds stumps up to 3" below ground
- Heavy-duty planetary gearbox
- Uses conventional rock saw teeth

Use the land clearing attachment for everything from brush clearing to stump removal. Since it uses conventional rock saw teeth, hitting rocks will not damage this beast! Increase the flexibility of your skid steer with just one attachment! Features of the land clearing attachment include an in line planetary gearbox for high torque, a piston type hydraulic motor for maximum efficiency, and no belts to tighten or bearings to grease. The downward cutting action will minimize debris while maximizing efficiency.

Specifications:

| Model | Weight, lb (kg) | Minimum Hydraulic Requirement, gpm (lpm) | Cutting Width, in (mm) | Drum OD, in (mm) | Number of Teeth |
|-------|--------------------|--|---------------------------|---------------------|-----------------|
| LCA48 | 2400 (1089) | 30 (113) | 48 (1219) | 27.25 (692) | 52 |
