

Brush Root Grapples

EDGE

- Independently operating grapples to handle uneven loads
- Tines get under roots and brush to handle more easily
- Three styles to suit varying applications and preferences

RG (Standard-duty)

BTR (Heavy-duty)

HD (Heavy-duty)

The EDGE brush root rakes are designed for handling awkward materials such as logs, trees stumps, brush or other loose materials. The open bottom allows dirt and small debris to fall through while keeping large debris in the grapples. All feature good forward visibility, dual, independently-operating grapples, and heavy-duty cylinders.

Specifications:

Model	Cylinder Type	Overall Width, in (mm)	Weight, lb (kg)	Open Height, in (mm)	Number of Tines
BTR66	Cushioned, Guarded	66 (1676)	810 (367)	44.9 (1140)	6
BTR78	Cushioned, Guarded	78 (1981)	960 (435)	44.9 (1140)	8
BTR90	Cushioned, Guarded	90 (2286)	1060 (480)	44.9 (1140)	10
RG66	Standard, Guarded	66 (1676)	723 (327)	38.6 (980)	8
RG72	Standard, Guarded	72 (1829)	820 (372)	38.6 (980)	9
RG78	Standard, Guarded	78 (1981)	865 (392)	38.6 (980)	10
RG84	Standard, Guarded	84 (2083)	913 (414)	38.6 (980)	11
HD72	Standard, Guarded	74.25 (1886)	1050 (476)	51.5 (1308)	10
HD78	Standard, Guarded	80.88 (2054)	1095 (496)	51.5 (1308)	11
HD84	Standard, Guarded	87.5 (2222)	1115 (506)	51.5 (1308)	11
HD90	Standard, Guarded	94.13 (2391)	1160 (526)	51.5 (1308)	12
